Hospital Management System with Real- Time Communication

Technologies:HTML,CSS,JavaScript,ReactJS,Django,SQL,and Python

Developed a full-stack Hospital Management System leveraging ReactJS for the front end and Django with Python for the backend. Utilized HTML, CSS, and JavaScript to design an intuitive and user-friendly interface. Implemented key modules such as patient registration, appointment scheduling, doctor management, and medical records tracking. Integrated SQL for efficient data storage and retrieval, enabling real-time data access and secure handling of patient information. The system supports user authentication, and responsive design for desktop and mobile devices. <inserted text>
